

Module 4 Project: Forecasting Forth Worth Housing Prices with Time Series Analysis

Graham Wilson

8/11/20

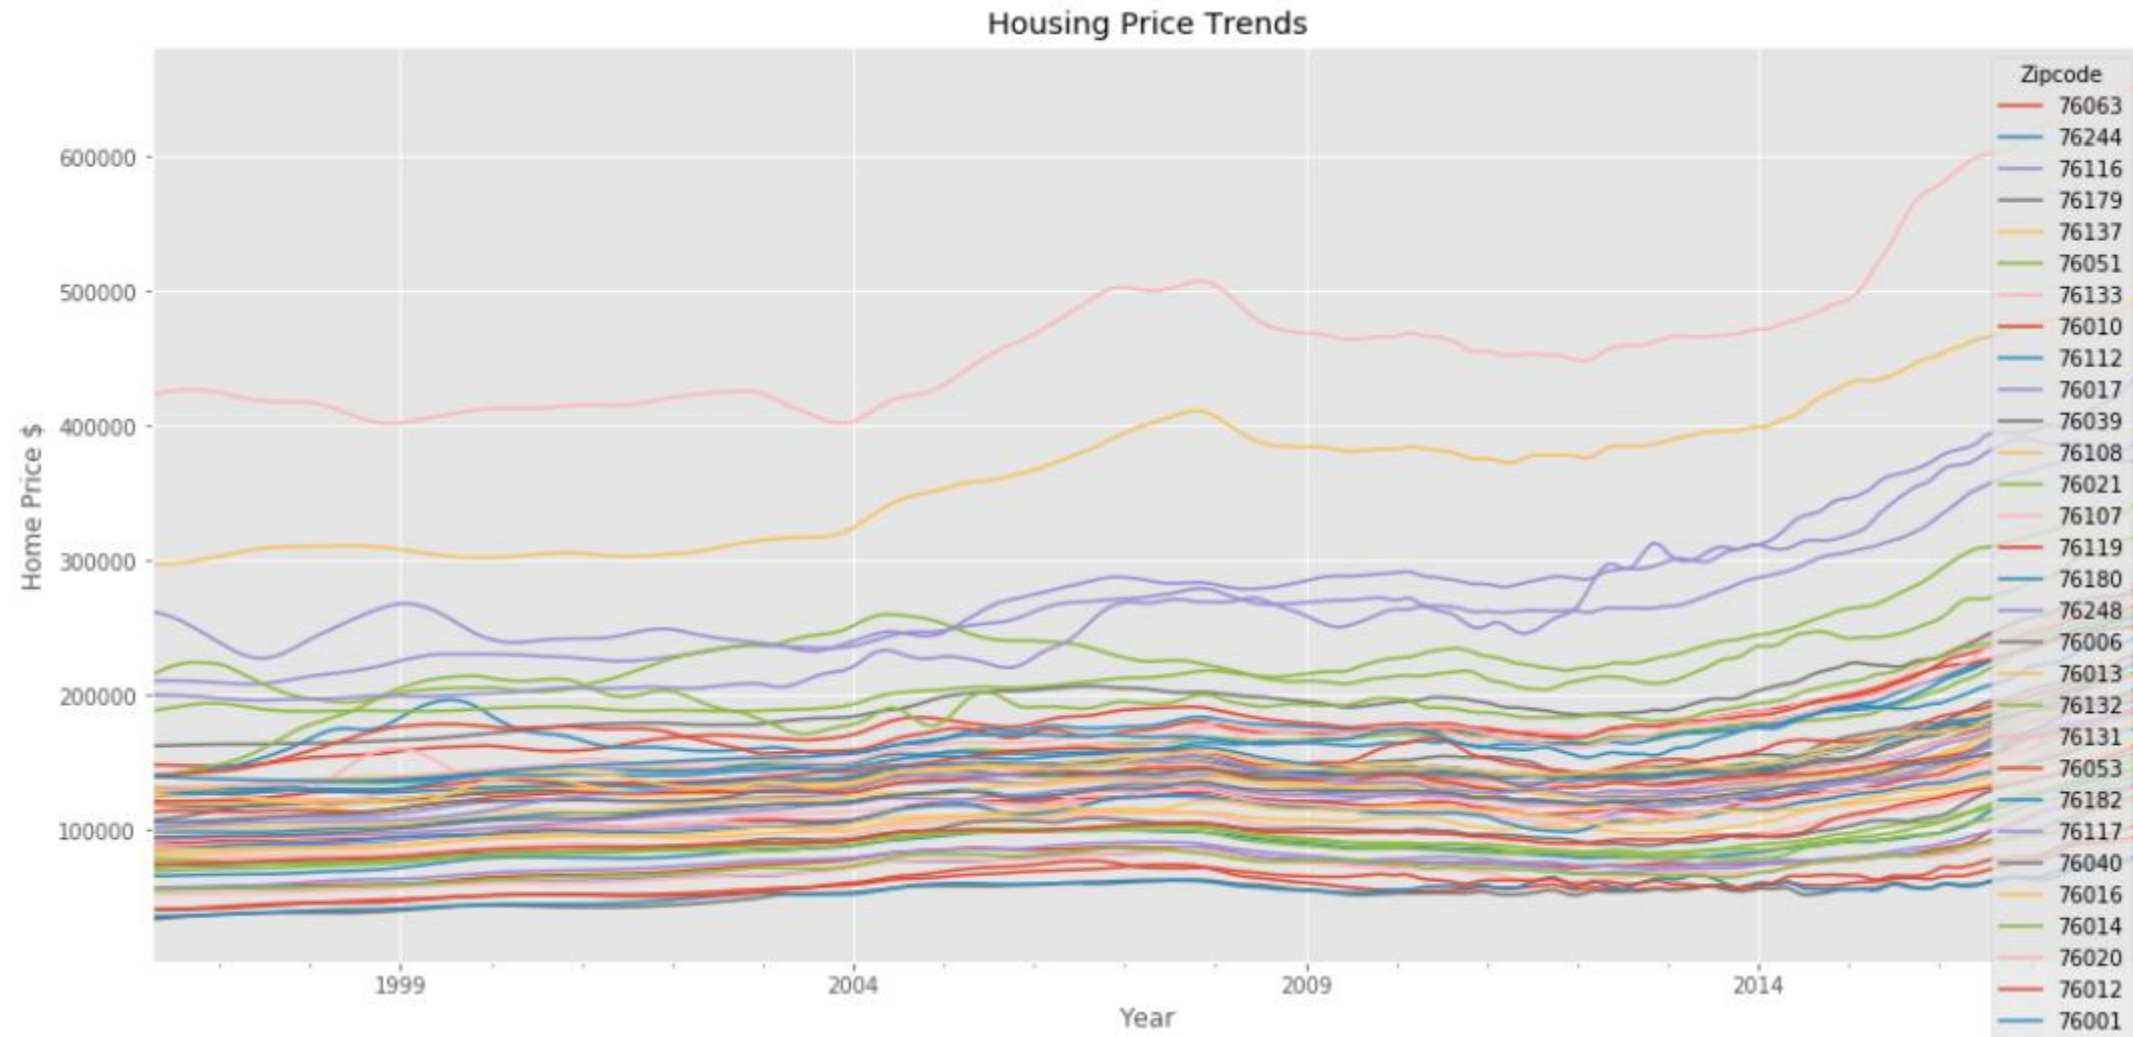

Project – Perform Time Series forecasting analysis on Zillow data

Dataset – <https://www.zillow.com/research/data/>

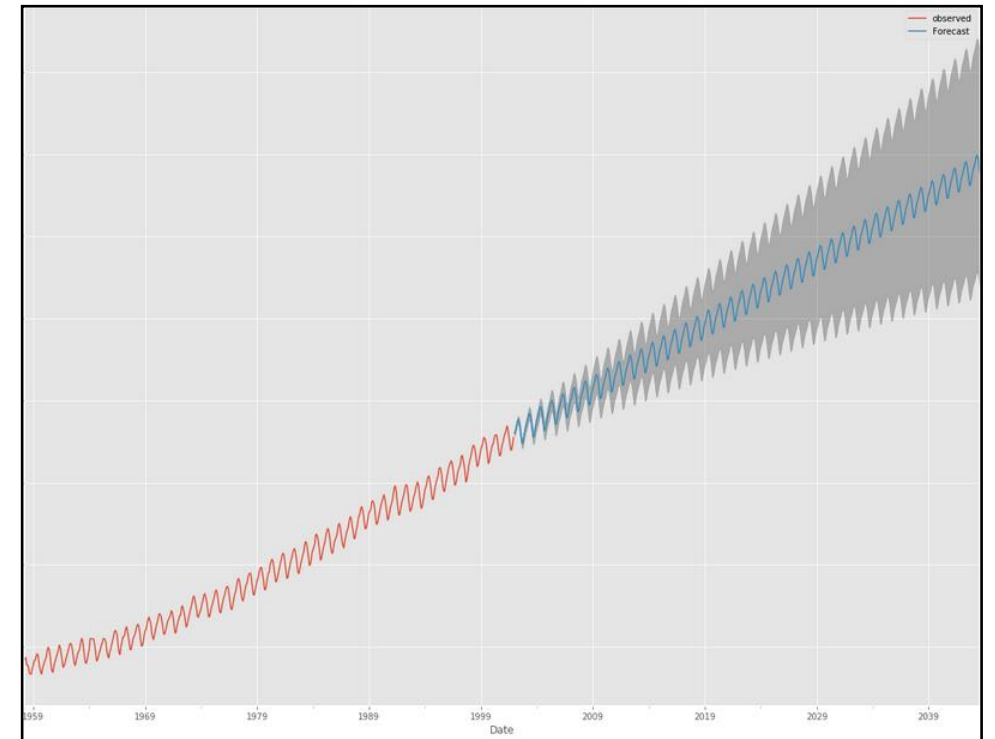

Goal – Provide five most profitable zip codes for 3yr return on investment (ROI) in Fort Worth.

23. Dallas-Fort Worth-Arlington, Texas	*
• 2010-2018 pop. growth: +16.9% (1.1 million)	
• 2018 unemployment: 3.6%	
• 2010-2018 employment change: +23.1% (+647,463)	
• Median household income: \$63,870	

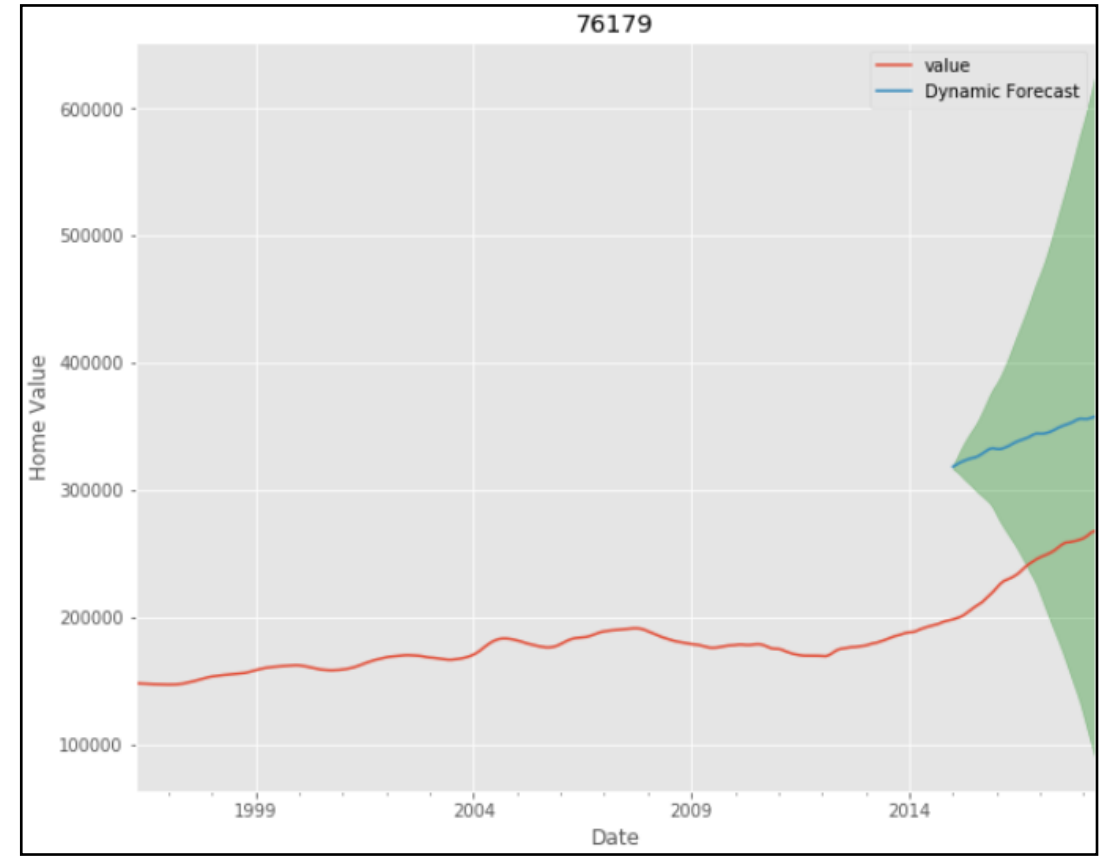

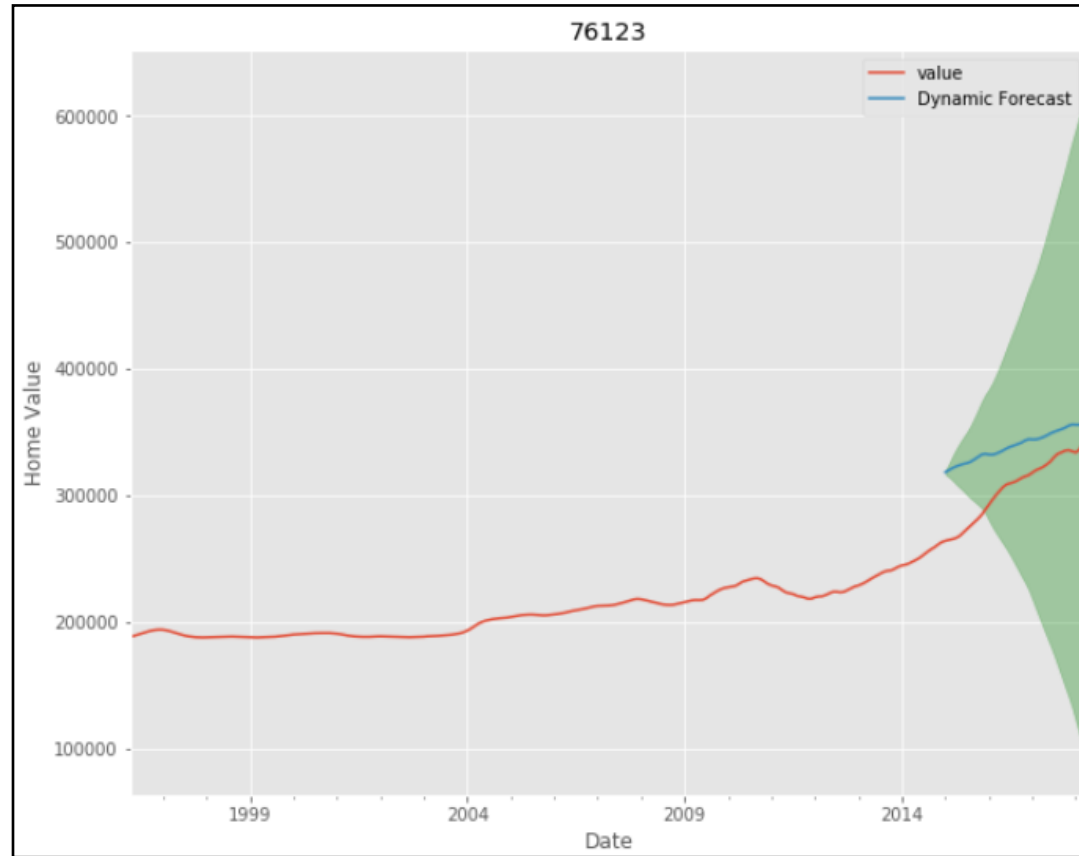

Fort Worth Housing Trends

- Use historical home price data to train a model for each zip code of interest.
- Past prices and trends influence future valuations.
- Evaluate trained model against test data.
- Forecast future home prices.

 3. 76137 – Watauga
 4. 76118 – Richland Hills
 5. 76244 - Keller
- Model results are flawed.
 - Next Steps:
 - Refine investment criteria – Include only current zip codes with prices between \$100-200K
 - Increase model parameter search for increased forecasting accuracy
 - Evaluate home values after the 2008 recession

Once the model is accurate:

- Invest in markets with high confidence intervals
- Integrate more data including –
 - School ratings
 - Rent/own ratio
 - Job opportunities
 - Nearby amenities
 - Demographics
 - Income levels
- Reassess forecasts yearly to compare how predictions hold up with reality
